The invention relates to a purified P30 antigen (I) chosen from 3 fully defined Toxo30del3C, Toxo30del2C and ToxoP30 MIX1 sequences, having 1-6 amino acids added to the C-terminus of the amino acid sequence of Toxo30del2C P30 antigen sequence, or comprising an amino acid sequence in which at least one of the five C-terminal cysteine amino acid sequence in which at least one of Toxo30del3C P30 antigen sequence chosen from MBP-Toxo30del3C(52-200aa), MBP-Toxo30del3C(52-294aa) and MBP-Toxo30del3C(52-300aa), MBP-Toxo30del4C(52-294aa) and MBP-Toxo30MIX1 fusion proteins. (I) is useful for detecting the presence of IgM antibodies to Toxoplasma gondii in a test sample, which involves contacting the test sample suspected of containing the IgM antibodies with a composition comprising (I) and detecting the presence of (I)/IgM antibody complexes. The present sequence represents DNA encoding a MBP-ToxoP30 fusion protein of the invention.
                                                                                                                     Novel purified polypeptide having sequence identity to amino acid sequence of P30 antigen of Toxoplasma gondii e.g. Toxo30del3C, Toxo30del2C, ToxoP30 MIX1, useful for detecting presence of IgM or IgG
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       CACCCATCAACAGTATTATTTCTCCCATGAAGACGGTACGCGACTGGGCGTGGAGGATC

The invention relates to a purified P30 antigen (1) chosen from 3 fully defined Toxo30de13C, Toxo30de12C and ToxoP30 MIX1 sequences, having 1-6 amino acids added to the C-terminus of the amino acid sequence of Toxo30de12C P30 antigen sequence, or comprising an amino acid sequence in which at least one of the five C-terminal cysteine amino acids of the amino acid sequence of Toxo30de13C P30 antigen sequence is substituted with alanine, or comprising the amino acid sequence chosen from MBP-Toxo30de13C(52-300aa), MBP-Toxo30de14C(52-294aa) and MBP-TOXO30MIX1 fusion proteins. (1) is useful for detecting the presence of Igm

The invention relates to a purified P30 antigen (I) chosen from 3 fully defined Toxo30de13C, Toxo30de12C and Toxop30 MIX1 sequences, having 1-6 amino acids added to the C-terminus of the amino acid sequence of Toxo30de12C P30 antigen sequence, or comprising an amino acid sequence in which at least one of the five C-terminal cysteine amino acid sequence in amino acid sequence of Toxo30de13C P30 antigen sequence is substituted with alanine, or comprising the amino acid sequence chosen from MBP-Toxo30de13C(52-300aa), MBP-Toxo30de14C(52-294aa) and MBP-Toxo30mIX1 fusion proteins. (I) is useful for detecting the presence of IgM antibodies to Toxoplasma gondii in a test sample, which involves contacting the test sample suspected of containing the IgM antibodies with a composition comprising (I) and detecting the presence of (I)/IgM antibody complexes. The present sequence represents DNA encoding a MBP-Toxo930 fusion protein of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            120
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           240
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      240
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            300
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   360

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        The invention relates to a purified P30 antigen (I) chosen from 3 fully defined Toxo30del3C, Toxo30del2C and ToxoP30 MIXI sequences, having 1-6 amino acids added to the C-terminus of the amino acid sequence of Toxo30del3C P30 antigen sequence, or comprising an amino acid sequence in amino acid sequence in the fave C-terminal cysteine amino acid sequence in amino acid sequence of Toxo30del3C P30 antigen sequence chosen from MBP-CC which alanine, or comprising the amino acid sequence is substituted with alanine, or comprising the amino acid sequence chosen from MBP-CC Toxo30del3C (52-30daa), MBP-Toxo30del4C (52-394aa) and MBP-Toxo30MIXI antibodies to Toxoplasma gondii in a test sample, which involves contacting the test sample suspected of containing the IgM antibodies contacting the test sample suspected of containing the presence of [I)/IgM complexes. The present sequence represents DNA encoding a MBP-VX.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      120

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
